## COMMERCIAL SOLUTIONS

### PLUMBING SOLUTIONS

Utilising the expertise of in-house plumbers and a specialist plumbing department, HNC offers tailored advice to facilitate superior plumbing solutions. As part of our service, we consistently specify best-fit products for both designers and architects, while also working with builders to value manage as required. We won't try and push specific products, either. We supply all the major brands in Australia and work with contractors to pick the right solution for their specific project needs. Now including a complete tile range, HNC Plumbing offers a one-stop-shop for kitchen and bathroom solutions that enables consistently high-quality outcomes for our clients.

### ELECTRICAL SOLUTIONS

Our Electrical Solutions are designed to streamline the construction process with fit-for-purpose products and expert guidance. Offering the insight of an experienced electrical team, we can advise on unique solutions that allow you to produce exceptional outcomes within tight budgets and limited timeframes. Our team have also been within the industry for a long time and have therefore developed long-standing relationships with our suppliers. This allows us to be first-to-market with a range of cutting-edge products, giving our clients a competitive advantage in their sector.

### TECHNOLOGY SOLUTIONS

HNC Technology delivers home automation systems to diverse clients, ranging from large residential developments and corporate projects right down to single-home solutions. Our team have over 40 years combined experience and are passionate about keeping on top of the latest technology trends. We also pride ourselves on our ability to test new products before putting them to practice, meaning we can jump in with the most accurate advice for every project. With a clear focus on client satisfaction, HNC Technology consistently works with our clients to deliver a solution that is fit-for-purpose, cost-effective where required and that delivers a truly spectacular home or corporate experience.
